“Protecting your employees,  
protecting your business.”

**Company Information:**

Woodward Safety, Health and Environmental Ltd. delivers health and safety training, fire safety, construction safety and also environmental management training. Consultancy and auditing are also undertaken.

Woodward Group has been delivering training for the past 17 years and has grown into one of the largest NEBOSH and IOSH centres in the UK. Woodward Group also has about 16 years experience and expertise in training armed forces personnel. We do very little advertising, and have been referred to as one of Cumbria's most successful best kept secrets. The majority of our delegates either find out about us through a referral or are with us for a 2nd, 3rd or in some cases 4th training course.

**Our Staff:**

The Woodward team are all qualified to the highest professional standards both in their technical knowledge and their systems management skills. They are all full time employees of the company who have vast experience in the commercial world. They are all Chartered Members of IOSH.

**Areas of Specialism:**

We have the appropriate skills to be able to deliver consultancy and legal compliance audits in the following areas:

- Health and Safety Management
- Fire Management
- Construction Management
- Environmental Management

This complete and comprehensive package of skills in one place means that the final management systems you put in place will be much more complete and cohesive rather than trying to juggle a number of different professional advisors.

**What we can do for you:**

The legal methodology has moved towards a non-prescriptive self regulatory system for Health and Safety, Fire, Construction and Environmental Management. No longer can you rely on external government representatives to rubber stamp your business and be sure that you are legally compliant.

Now you must complete your documentation yourself.

Woodward can provide guidance and advice for you to complete your risk assessments, safety policies and other mandatory documentation. We can tell you which areas of the law are relevant to your business and what you need to do to give them appropriate consideration.

We are not out to scare you - our approach is to work in partnership with our clients to help protect them.

After your management systems are in place we can perform a compliance audit, to make sure that your management systems and documentation are as watertight as they can be.

**Costs:**

The cost for this work depends on your requirements, the number of sites your company has and the amount of work that needs to be done.

Please contact us to discuss your requirements so we can tailor the work we do for you to your bespoke requirements.

Please contact Sharon for further information:
